

# Rich Road Solar Energy Center St. Lawrence County, New York

---

## NOTICE OF INTENT TO FILE AN APPLICATION

This notice announces that on or about January 25, 2023, Rich Road Solar Energy Center, LLC (“RRSEC” or the “Applicant”), a wholly owned subsidiary of EDF Renewables Development, Inc. (“EDF”), intends to submit an Application to the Office of Renewable Energy Siting (“ORES” or the “Office”), pursuant to Section 94-c of the New York State Executive Law (the “94-c Process”), seeking a Siting Permit from the Office authorizing the construction and operation of a major solar electric generating facility up to 240 megawatts (“MW”) in capacity along with 20 MW of battery energy storage in the Town of Canton, St. Lawrence County, New York (the “Facility”). The 94-c Process establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR § 900.6 and [www.ores.ny.gov/regulations](http://www.ores.ny.gov/regulations).

The Facility is proposed to include the installation of arrays of photovoltaic panels, approximately 10 feet in height and arranged in discrete subarrays dispersed throughout the Facility Site, as well as associated electrical collection lines, inverters, a battery energy storage system, interconnection substation, fencing, access roads and an operations and maintenance building. Power generated at the Facility will be stepped up to the interconnection voltage at the Facility substation. The Facility will interconnect to the New York electrical grid via a new Point of Interconnection, located on the New York Power Authority’s Moses to Adirondack transmission line. The Project substation will be a new facility and located within the Facility Area. More information on the proposed Facility can be found on the project’s dedicated website ([www.richroadsolar.com](http://www.richroadsolar.com)), or on the ORES website (<https://ores.ny.gov/permit-applications> under ORES Matter 22-00031).

The Facility is a zero-emission solar energy facility that will assist the State in meeting the goals of the Climate Leadership and Protection Act and State Energy Plan, which includes obtaining 70% of energy generation from renewable sources by 2030 and significantly reducing greenhouse gas emissions. Other positive impacts of the Facility include diversification of energy supplies, new employment opportunities (both temporary construction employment and full-time jobs), and increased revenues to the Town of Canton, St. Lawrence County, and the Canton Central School District, payments to participating landowners, and support of local businesses through patronage of the local hospitality industry and purchase of local supplies and goods. In addition, RRSEC has attempted to minimize impacts associated with the Project, for example, by limiting the disturbance to forested lands and threatened and endangered species to the maximum extent practicable. RRSEC will submit an Application that includes extensive studies evaluating the potential impacts associated with the Facility and identified methods which have been agreed to be implemented to avoid, minimize and mitigate potential impacts. This notice is being provided in accordance with 19 NYCRR § 900-1.6(c) and is being published no less than 3 days prior to the filing of the Application.

Pursuant to 19 NYCRR 900-5, RRSEC will submit with the Application \$1,000 dollars for each MW of capacity for local agencies and potential community intervenors, which for this project, totals \$240,000. Any local agency or potential community intervenor can submit a request to the Office for funding within thirty (30) days of the date of the application filing. By regulation, 75% of the local agency account funds shall be reserved for local agencies. Intervenor requests will be made to the Office of Renewable Energy Siting, Attention: Request for Local Agency Account Funding, 99 Washington Avenue, Albany, NY 12231-0001.
